EDUCATION

National Institute of Technology (NIT), Trichy <i>Masters of Computer Applications (MCA)</i>	2023 - 2026 CGPA: 8.55*
Technical Courses: Analysis and Design of Algorithms, Data Structures & Algorithms, Operating Systems, Database Management Systems, Problem Solving, Computer Networks, Probability & Statistics, Machine Learning, OOP	

ACHIEVEMENTS

- ICPC World Finalist** - ICPC World Finals 2025, held in Baku, Azerbaijan [Profile](#)
- Codeforces - Candidate Master**, Maximum Rating: **1984** - India Rank under **150** [Profile Link](#)
- Secured **Rank 28** in **IICPC CodeFest 2025 Finals** held in IIT Madras out of **50,000** participants.
- Secured **Global Rank 464** in Google Kickstart Round D 2022 [Ranklist](#)
- Secured **Global Rank 968** in Meta Hackercup 2022 - Round 2 [Certificate](#)
- Codechef - 5 Star**, Maximum Rating: **2152** [Profile Link](#)
- Leetcode - Guardian**, Maximum Rating: **2533** - **Top 0.21%** Globally [Profile Link](#)

EXPERIENCE

Software Engineer Intern Rubrik (India)	Jan 2026 - June 2026
- Contributed to Rubrik's SaaS Anomaly Detection platform by working on a new feature, Impact Investigation, designed to facilitate investigation workflow that enables IT teams to quickly analyze disruptive events such as ransomware attacks and mass deletions through a unified dashboard. - Built workflows to surface environment-wide data changes across multiple protected workloads, enabling users to visualize impact, analyze affected systems, and identify the blast radius of incidents more efficiently. This reduced Mean Time To Recover (MTTR) from an incident from days to minutes/hours. - Resolved Customer-Found Defects (CFDs) related to false-positive Mass Deletion anomalies caused by large file move operations by estimating moved-file counts and correcting input values for the Python detection model. - Worked with Go, C++, Python, BigQuery (OLAP), Distributed Systems, GraphQL, and Claude Code.	
Summer Analyst Goldman Sachs Certificate	May 2025 - July 2025
- Integrated a GS AI LLM (internal) into Goldman Sachs' internal Operational Risk event reporting platform to enhance the accuracy of operational risk event classification by dynamically suggesting the correct risk taxonomy. - Developed backend services in Java/Spring and frontend components in React.js, and optimized prompt engineering strategies to maximize LLM performance and user guidance.	
Problem Setter Intern SCALER (InterviewBit) Certificate	Jan 2024 - July 2024
Create, Write and Test DSA problems on the platform, add language supports in various languages. Review and update content scripts/notes for better learner experience, Resolve Doubts with DSA expertise.	

PROJECTS

Chess Engine - Github Link <i>Python, PyGame, Search Algorithms, GameAI, Heuristics</i>	June 2024
- Uses Mini-Max algorithm for searching moves which is then optimized with Alpha-Beta Pruning and memoized with transposition table with better move ordering to achieve an ELO of 1500 at depth 5. - Implemented Multiprocessing for more optimisation to speed up the computation of the moves parallelly while playing	
Real-Time Speech Translator - Github Link Vibe Coding - Journey <i>ChatGPT, Cursor</i>	21 Aug 2025
- Built a real-time speech translation app using Next.js, React, and Google Gemini for low-latency per-segment translation. Integrated Groq SDK (Whisper) for speech-to-text and Gemini (multiple models) for text translation. - Built in 5 hrs with no manual code effort, only using Cursor AI agent with ChatGPT for design guidance.	
TypeRacer - Github Link <i>ReactJS, NodeJS, PostgreSQL</i>	March 2024
- Created a Typing Application which gives user a paragraph to type and tells them their typing speed in WPM. - Implemented functionalities for login/signup, Results, Admin - Create / Update / Delete Game, Leaderboard.	

TECHNICAL SKILLS

Languages: C/C++, Go, Java, Python, JavaScript, SQL, HTML/CSS, LaTeX
Frameworks & Libraries: React.js, Spring, GraphQL
Databases & Data Platforms: PostgreSQL, BigQuery (OLAP), Snowflake
Tools & Technologies: Git, Node.js, Linux, Kubernetes, Cursor AI, Codex, Claude Code
Core Areas: Data Structures & Algorithms, Distributed Systems, Machine Learning

POSITIONS OF RESPONSIBILITY

- Chairperson, ACM Student Chapter, NIT Trichy** – Led Infotrek'24 and coordinated chapter activities.
- Algos Member, Spider R&D, NIT Trichy** – Organized algorithm workshops, contests, and problem-setting activities.
